**Subject:** RE: checking in

Hi Mr. (b) (6)

Thanks for forwarding the article to me. I haven't heard anything from the journalist this time around, so am not sure what prompted the follow-up either.

As far as an update, we are waiting to get a list submittal from ADEC before we can take any action one way or another. It is my understanding that they are still evaluating the information in the report and are looking closely at the data that was collected. As of right now, they have not yet submitted anything to EPA indicating a decision one way or another as to whether they will make an impairment determination or not. Once they have submitted a list to us with their final decision and their rationale for it, then we can proceed with our approval or disapproval of their list. So, unfortunately, I don't have any real exciting update for you right now. Please feel free to contact me anytime you have additional questions though, and I appreciate you keeping me in the loop as to the local information that's out there. Take care.

jill

This article got me thinking it was probably time to check in with you again. Not sure what prompted the reporter to pick this story up again.
